Justify your answer #1

The graph below shows the number of cars washed per day at the local car wash.

Which equation below *best* represents the number of cars washed per day at the local car wash?

**A**  $c = 2d + 18$

**B**  $c = \frac{d}{20}$

**C**  $c = 2d + 36$

**D**  $c = 20d$

Write an explanation proving why your answer choice is correct. Be specific and show all work.
