

Practice #2

Name _____

For each problem, use inverse operations to find the missing value. Show your work and check your answers.

1 $6x + 8 = -4$	2 $-2x - 10 = -16$
3 $\frac{x}{3} - 18 = -11$	4 $\frac{x}{4} - 10 = -14$
5 Renee bought a book for \$6.50 and some new notebooks for \$2 each. She spent a total of \$22.50. Write and solve an equation to determine the number of notebooks Renee bought. <ol style="list-style-type: none">1. Define the variable:2. Write the equation and solve:
